

SAM's Sport Ultrasound Testimonial Letter

My name is Jeran King,

I recently received a Sam's sport unit from Pro Med at the request of my treating doctor. I have post-operative knees which have troubled me for years. I have been using the Sam's unit for both of my knees and I am here to tell you it is fantastic. I use it during the day for a couple of hours each day which maintain a 4/5 pain score as opposed to the previous consistent 10 on a 10 pain scale. Occasionally, due to overuse or weather changes my pain increases, when this happens I use the unit for the full eight hours during the day which within an hour brings the pain back down to a 4/5 on a ten scale and keeps it there for several days. I have used Tens unit's for years on my knees, and while it works, it only works while the unit is actually on. That is the biggest difference in my mind between the two technologies. The Sam's unit maintains me consistently at a 4/5 day to day and as I said, if I have a flare up, it controls it in under an hour and can keep it under control for days without further use.

Above and beyond the extreme success at controlling my chronic pain, unbelievably is it also ideal for treating my acute pain. I have a completely torn rotator cuff with tendon retraction in my shoulder. I plug the Sam's Sport unit in at night to charge, sleep with it on my shoulder, and despite the fact that I am awaiting surgery I am basically pain free throughout the day with respect to the shoulder. I cannot say enough about this technology! As life altering as this technology has been for me it is shockingly easy to use as well.

Respectfully,

Jeran King
